AMERICAN AUTO-MATRIX INTRODUCES **NATIVE SERIES**

EXPORT, PA (9/25/02) — American Auto-matrix is introducing its first wave of BACnet compatible controllers. Our **Native Series** products comply with ANSI/ASHRAE Standard 135-2001, BACnet. The Native Series is intended to give customers the interoperability they desire and the security of knowing they are not locked to a single vendor. The communications-intensive **SAGE^{MAX}** area controller offers the flexibility of multiple communication protocols, including BACnet IP, BACnet Ethernet and BACnet MS/TP, as well as powerful trending, scheduling, alarming and programming capabilities, while the **NB-ASC** and **NB-ASC(e)** application selectable unitary controllers are used in heat pump, rooftop and fan coil applications. In addition, American Auto-Matrix is releasing its **NB-VAVr**, **NB-VAVra**, **NB-VAVrf**, **NB-VAVta**, and **NB-VAVtf** variable air volume (VAV) and constant air volume (CAV) terminal box unitary controllers. Also out for release is the **NB-V3Tb** and **NB-V3Td** unitary controllers that enable constant volume air handler units (AHU) to supply variable volumes of air. All Native Series products utilize the industry's only true graphical display temperature sensor – the SBC-STAT3 – which allows the user to change setpoints, place a system into occupied override and interface to the controller directly through the room sensor without the need for additional hardware or software. The Native Series is presently available for shipment through authorized American Auto-Matrix Solution Integrators. American Auto Matrix designs and manufactures a wide range of products and solutions for the building automation industry, and is a pioneer of open architecture, generation-to-generation compatibility, direct digital control (DDC) and object-oriented programming. For more information, visit our website at www.aamatrix.com or call 724-733-2000.

American Auto-Matrix, located in Export, PA, is widely recognized for providing Smart Building Solutions™ for building automation. Applications include HVAC; access control; light process; laboratory and fumehood; energy management; and integrated fire, security, and life-safety management. American Auto-Matrix systems are sold, installed, and maintained through an international network of Solution Integrators.
