SBC-GPC Family of Controllers Released

Export, PA July 1st, 2005- American Auto-Matrix is pleased to announce the latest release in the next generation of Smart Building Solutions[®]: the SBC-GPC family. These Public Unitary Protocol (PUP) controllers have been designed with an emphasis on lowering the overall installed cost of a job while offering a level of flexibility unprecedented in the industry today.

Using our innovative STATbus[™] technology: a two-wire, polarity in-sensitive, free topology, “smart” I/O networking protocol, a building automation system can be built from the ground up, point-by-point, while also providing single to multiple point expansion capabilities.

###

American Auto-Matrix, located in Export, PA, is widely recognized for providing Smart Building Solutions[™] for building automation. Applications include HVAC; access control; light process; laboratory and fumehood; energy management; and integrated fire, security, and life-safety management. American Auto-Matrix systems are sold, installed, and maintained through an international network of Solution Integrators.
